Professional Summary

Cybersecurity Integrations Engineering Leader with 17+ years of experience designing, delivering, and scaling integrations across SIEM, SOAR-style workflows, CMDB, CSPM, CI/CD, cloud providers, and vulnerability management platforms. Led a 20-member engineering team at Qualys, built 24+ high-impact security integrations, and shaped API and connector strategy across 11+ partner ecosystems. Deep expertise in security data pipelines, event-driven ingestion, API normalization, mapping frameworks, multi-tenant SaaS architecture, and cloud-native platforms (AWS/Azure). Strong cross-functional leadership working with Product, Security Engineering, Customer Success, and external vendors.

Core Skills

SIEM Integrations (Splunk, QRadar, Elastic, Sentinel) • Vulnerability Management Workflows • CSPM/Cloud Integrations (AWS/Azure/GCP) • CMDB Integrations (ServiceNow, BMC) • Data Normalization & Mapping • API & Connector Architecture • Event-driven Systems (Kafka, SQS) • Multi-Tenant SaaS • Security Telemetry Pipelines • Python • REST APIs • DevOps & CI/CD Integrations • Security Automation • GTM & Partner Engineering Collaboration

Leadership Highlights

- Led end-to-end delivery of 24+ cybersecurity product integrations powering asset inventory, SIEM ingestion, VM workflows, and cloud security use cases.
- Managed a 20-member engineering team driving roadmap, execution, process maturity, and delivery governance for security integrations.
- Influenced platform-wide API and connector strategy improving scalability, consistency, and partner onboarding experience.
- Partnered with Product, Security Engineering, GTM, and Customer Success to shape integration direction and ensure field readiness.

Professional Experience

Qualys - Subject Matter Expert, API and Integrations (October 2022 – April 2025)

- Defined integration patterns and security telemetry workflows across SIEM, CMDB, cloud, and CI/CD ecosystems.
- Guided cross-product teams on API architecture, schema consistency, ingestion pipeline design, and partner alignment.
- Improved connector reliability and ingestion accuracy through reusable frameworks, mapping rules, and error-handling standards.
- Supported field engineering, customer success, and strategic customers on integration architecture, troubleshooting, and optimization.
- Ensured alignment of integrations with security, compliance, and performance requirements.

Qualys - Sr. Manager, Integrations Engineering (April 2015 – October 2022)

- Built and managed a 20-member engineering team specializing in cybersecurity product integrations.
- Delivered 24+ integrations supporting SIEM, CMDB, cloud posture, CVE correlation, ticketing automation, and DevSecOps workflows.
- Modernized legacy ingestion pipelines improving throughput by 40%, reducing errors by 30%, and increasing data reliability.
- Owned multi-quarter roadmaps, execution governance, and coordination with Product, Security, and Partner teams.
- Implemented engineering processes for schema mapping, documentation, and validation improving delivery speed and quality.

Key Cybersecurity Integration Projects

- **SIEM Modernization** - Rebuilt connectors for Splunk, QRadar, Azure Sentinel improving event ingestion performance by 40%.
- **CMDB Sync Framework** - Designed normalized asset-to-CMDB mapping pipelines reducing sync failures by 25%.
- **Cloud Provider Integrations** - Enhanced AWS/Azure ingestion flows with optimized throttling, polling, and metadata normalization.
- **DevSecOps Integrations** - Delivered Jenkins, Atlassian Bamboo, GitLab CI, and Azure DevOps integrations enabling vulnerability gating and security automation.
- **VM Ecosystem Enablement** - Built workflows for CVE correlation, asset context enrichment, and vulnerability export pipelines to create actionable work items based on detections.
- **Actionable Ticketing Integrations** - Drove end-to-end delivery of ticketing automation features that improved vulnerability transparency, ensured correct team ownership, and reduced MTTR by 10–20%.

Technologies & Platform Expertise

AWS (EC2, IAM, Lambda, SQS, API Gateway) • Security Telemetry Pipelines • ETL/Data Ingestion • Python • Docker • REST APIs • Multi-Tenant SaaS • Logging/Monitoring • Webhooks • Schema Mapping • Security Platform Integrations

Early Career (2006-2015) - Engineering Roles

Blue Coat Systems - Sr. Software Development Engineer

- Improved analytics, reporting engines, and automation modules within a security product environment.

Other Companies (Faraji E-consulting, Zest Infotech, Cybrevo, Cybermedia, Persistent Systems, Centillion)

- Delivered integrations, backend services, automation tools, UI modules, and security-related engineering projects.

Education

M. Sc. (Computer Science)

University of Pune, 2007
